

Lexman Sreenivasan

Full Stack Software Engineer · Frontend & Backend Development · Cloud Infrastructure

vslexman@gmail.com | +49 155 1104 6687 | Mannheim, Germany

PROFESSIONAL SUMMARY

Full stack software engineer with 2+ years of production experience building scalable web applications and cloud services. Proven track record delivering complete frontend-to-backend solutions using TypeScript, Node.js, Express.js, and modern cloud infrastructure on Google Cloud Platform. Demonstrated ability to write clean, maintainable code while participating in agile development practices including code reviews and CI/CD automation. Currently based in Mannheim with full German work authorization, passionate about creating exceptional user experiences backed by reliable backend services.

WORK EXPERIENCE

FullStack Software Engineer at Gizmeon Technologies (Remote)

Jun 2023 – Present | Infopark Kochi, India

- Built and operated scalable web applications serving 1M+ users across Chrome OS, Windows, and Linux platforms, focusing on customer satisfaction and optimal user experience through Progressive Web App (PWA) development.
- Developed full stack solutions using TypeScript, Node.js, Express.js, PostgreSQL, and Google Cloud Platform, delivering end-to-end functionality from frontend interfaces to backend services.
- Engineered clean, maintainable backend services with comprehensive data pipelines, ensuring reliable cloud service operations through proper error handling, monitoring, and automated testing.
- Implemented CI/CD automation using Docker, Kubernetes (GKE), Cloud Build, and GitHub, establishing integration pipelines that improved deployment reliability and reduced release cycles.
- Created responsive web UIs optimized for productivity, replacing native applications with lighter, more maintainable web-based solutions that improved cross-platform compatibility.
- Participated in agile development practices including code reviews and collaborative development, maintaining high code quality standards across full stack implementations.
- Built comprehensive reporting and analytics solutions using PostgreSQL, BigQuery, and Redis, delivering actionable insights through well-tested, scalable backend services.
- Developed real-time data processing systems using Google Cloud Pub/Sub and cloud functions, ensuring reliable service operations and high system availability.
- Led device management and monitoring solutions for 2,500+ devices using cloud messaging services, maintaining operational stability through automated monitoring and alerting.
- Delivered complete web applications within tight deadlines, including a full campaign management tool built in one month with advanced filtering and user interface optimization.

EDUCATION

University Of Kerala – Adoor, Kerala, India

Bachelor's Degree in Computer Applications

2019 - 2022

VOLUNTEERING & OPEN-SOURCE

Backend Developer & Database Manager at Apparel Textile Recycling Startup, Germany

Dec 2025 – Present

- Leading full stack development for a centralized web platform using Node.js and PostgreSQL, collaborating with cross-functional frontend and mobile development teams in agile environment.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL, HTML, CSS

Frontend Frameworks & Libraries: ReactJS, Redux, Tailwind CSS, Video.js

Backend Frameworks & Libraries: Node.js, Express.js, NestJS

Databases: PostgreSQL, BigQuery, MongoDB (familiar), Redis

Cloud & Infrastructure: Google Cloud (Pub/Sub, GCS, GKE, Cloud Functions, BigQuery), Docker, Kubernetes, Linux

DevOps & CI/CD: Cloud Build, GitHub Actions, Docker, Kubernetes, Helm

Development Tools: REST APIs, Swagger, Jest (testing), GitHub

AI Development Tools: Claude Code, Github Copilot, ChatGPT, Gemini, OpenClaw

LANGUAGES

English — C1 (IELTS Certified)

German — A2 (Currently studying)

Malayalam — Native
