PROFILE

Fullstack developer with 3 years of professional experience building web applications end to end, from React and TypeScript frontends to Node.js and NestJS backends on cloud infrastructure (GCP, AWS). I have shipped production systems in AdTech, launched two live web products of my own, and contribute as a volunteer developer to two German startups, including CXR AI in Worms. I write clean, testable code, use AI tools daily, and deliver features from idea to production. English C1, German A2 (learning).

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, SQL, HTML, CSS
Frontend	React, Redux, Tailwind CSS, Video.js, PWA, responsive UI
Backend	Node.js, NestJS, Express.js, REST APIs
Databases	PostgreSQL, BigQuery, Redis
Cloud & DevOps	GCP (GKE, Pub/Sub, BigQuery), AWS (Lambda, S3), Docker, Kubernetes, CI/CD (ArgoCD), Git
Practices & AI	Automated testing, code reviews, Scrum; Claude, ChatGPT, GitHub Copilot

WORK EXPERIENCE

Software Engineer, Gizmeon Technologies <i>AdTech, Ad Exchange Platform • Remote</i>	Jun 2023 – Present
- Built fullstack features for an ad exchange platform, from React frontends (Redux, Tailwind, a PWA media player) to Node.js and TypeScript backend services. - Developed and optimised backend services, REST APIs and real-time data pipelines (Express, NestJS, Pub/Sub, BigQuery, Redis), supporting a 60% revenue increase. - Built React dashboards and reporting UIs used daily by business teams, including Mapbox integration with real-time overlays and filters. - Maintained CI/CD (Docker, Kubernetes/GKE, ArgoCD, Cloud Build) and monitoring, and operated Redis in high-availability production clusters. - Delivered a campaign-buying tool from concept to production within one month, and worked in Scrum with code reviews and mentoring of junior developers.	

SELECTED PROJECTS

Everframes – Full-Stack Web Application	Live in Production
Designed, built and shipped a full-stack web application solo (React, Node.js, Express, Firebase), running in production with real users.	
MyHireLoop – AI-Powered Web Application	Live in Production
Built and shipped an AI-powered job-application tracker (React, Express) with document generation and a Kanban board, deployed and live.	

VOLUNTEERING

Backend Developer (Volunteer), CXR AI <i>AI Services Startup • Worms, Germany</i>	2026 – Present
Build backend services and APIs for a Worms-based AI services startup, integrating AI capabilities into product features and advising on architecture and data handling.	
Backend Developer (Volunteer), Aparo <i>Textile Recycling Startup • Germany</i>	Dec 2025 – Present
Lead backend development and database management (Node.js, PostgreSQL) for a German textile-recycling startup building a centralised recycling platform.	

EDUCATION & LANGUAGES

Bachelor of Computer Applications (BCA) • College of Applied Science, Adoor (University of Kerala), India • Jan 2022 <i>Three-year undergraduate computer science degree (programming, databases, web and application development).</i> English (C1, IELTS verified) • German (A2, learning)
