SUMMARY

Backend-focused software developer with strong experience in designing and building scalable, high-performance web services using NodeJS, ReactJS, and Google Cloud Platform (GCP). Proven contributor to backend systems that improve reliability, optimize data processing, and support revenue-driven applications. Works closely with cross-functional teams to deliver production-ready APIs, data pipelines, and cloud-native solutions, while continuously deepening expertise in system design, performance optimization, and distributed architectures. Driven by a strong focus on problem-solving and measurable technical impact.

SKILLS

Languages: JavaScript, TypeScript, SQL, HTML, CSS

Frameworks & Libraries: Node.js, Express.js, NestJS, ReactJS, Redux, Tailwind CSS, Video.js

Databases: PostgreSQL, BigQuery, Redis (Cluster)

Cloud & Infrastructure: AWS (Lambda, S3), Google Cloud Platform (GCP Services, BigQuery, Pub/Sub, GCS, GKE, Cloud Functions), Linode Services, Wasabi Services, Docker, Linux

Tools & Technologies: VAST, RTB, IMA SDK, Progressive Web Apps (PWA), REST APIs, Swagger Documentation, Mapbox, Helm, ChatGPT, GitHub Copilot

WORK EXPERIENCE

Software Developer — Gizmeon Technologies, Kochi, India

Jun 2023 – Present

Ad Exchange & Over-the-Top (OTT) Platforms

- Played a key role in the development and scaling of an Ad Exchange platform, contributing to publisher onboarding, inventory expansion, and backend services that enabled efficient monetization and targeted ad delivery.
- Contributed extensively to the implementation and optimization of campaign servers and RTB servers, enabling real-time ad delivery and tracking using Pub/Sub, Google Cloud Storage (GCS), and BigQuery, supporting a **60% increase in revenue**.
- Actively involved in designing and maintaining backend data pipelines to track ad requests, impressions, and transactions, ensuring reliable and high-throughput data availability for analytics and reporting.
- Developed and enhanced multiple revenue, performance, and demographic reporting solutions using Node.js, Express.js, BigQuery, PostgreSQL, Redis, and GCP services, delivering actionable insights to internal teams and stakeholders.
- Contributed to the design, automation, and maintenance of CI/CD pipelines using Docker, Google Kubernetes Engine (GKE), Cloud Build, ArgoCD, and GitHub, improving deployment reliability and reducing release turnaround time.
- Supported the migration and operation of Redis in clustered Kubernetes environments, assisting in performance tuning, high availability configuration, and production stability during peak traffic.
- Implemented server-side ad caching mechanisms to retrieve, store, and serve ads efficiently, improving ad availability and reducing latency across placements.
- Contributed to the development and optimization of OTT platform features, including HTML5 and Video.js-based players, live streaming, and VMAP ad integrations using IMA SDK and PWA technologies, supporting a **35% increase in ad engagement**.
- Integrated Mapbox with real-time overlays and dynamic filters to support location-based ad targeting and optimize ad placement decisions.
- Assisted in monitoring and observability initiatives for backend services and Redis clusters, contributing to improved issue detection and overall system reliability.
- Supported large-scale device management and monitoring workflows for **2,500+ devices** using Firebase Cloud Messaging (FCM), ensuring high uptime and operational stability.

EDUCATION

College of Applied Science, Adoor Affiliated to University of Kerala

2019 – 2022

- Bachelor's Degree in Computer Applications

LANGUAGES

English: C1 (CEFR) — IELTS General

Test Report Form (TRF) No.: 25IA520682VARL008G
